Crafts and Making Trivia

Questions 1-4 | Circle one answer

1. Which craft commonly uses two needles to form loops of yarn?

A. Knitting
B. Pottery
C. Woodturning

2. Which craft commonly uses a single hooked tool and yarn?

A. Weaving
B. Etching
C. Crochet

3. Which device holds threads under tension for weaving?

A. Easel
B. Loom
C. Kiln

4. What are the lengthwise threads on a loom called?

A. Glaze
B. Grain only
C. Warp

Crafts and Making Trivia

Questions 5-8 | Circle one answer

5. What are the threads woven across the warp called?

A. Weft
B. Wick
C. Wire only

6. Which heated chamber is used to fire pottery?

A. Loom
B. Kiln
C. Freezer

7. Which decorative needlework places stitches onto a fabric surface?

A. Origami
B. Casting
C. Embroidery

8. Which paper craft is associated with folding shapes without needing cutting?

A. Origami
B. Mosaic
C. Felting

Crafts and Making Trivia

Questions 9-12 | Circle one answer

9. What is an image made from small pieces of tile, stone or glass called?

A. Sketch
B. Mosaic
C. Tapestry only

10. What is the process of interlocking wool fibers with moisture or needles called?

A. Glazing
B. Turning
C. Felting

11. Which tool is commonly used to cut fabric?

A. Compass needle only
B. Scissors
C. Whisk

12. What is a decorative glossy coating fired onto pottery commonly called?

A. Glaze
B. Varnish cloth
C. Yarn

Crafts and Making Trivia

Answer guide 1-4 | Keep with host

1. A. Knitting

Knitting commonly uses two needles to form interlocking loops. Other needle arrangements exist, so the question describes the familiar basic method rather than every technique.

2. C. Crochet

Crochet uses a hook to draw loops through other loops. Its tool distinguishes it from the familiar two-needle form of knitting in the previous question.

3. B. Loom

A loom holds warp threads while other threads are woven across them. The device supports a structured process rather than simply storing a bundle of yarn.

4. C. Warp

Warp threads run lengthwise on a loom. The crossing threads are called weft, making the pair a useful vocabulary connection for participants who enjoy textiles.

Crafts and Making Trivia

Answer guide 5-8 | Keep with host

5. A. Weft

Weft threads pass across the warp. Together the two directions create woven fabric, which differs structurally from fabric formed by interlocking knitted loops.

6. B. Kiln

A kiln reaches temperatures needed for firing clay. It is specialized equipment, so the answer is a definition rather than advice to improvise a firing method.

7. C. Embroidery

Embroidery decorates fabric with stitches. It can be done by hand or machine and includes many traditions, so the quiz does not limit it to one style.

8. A. Origami

Origami is strongly associated with paper folding. Some broader traditions use additional techniques, but folding is the defining clue in this introductory question.

Crafts and Making Trivia

Answer guide 9-12 | Keep with host

9. B. Mosaic

A mosaic assembles small pieces into a larger design. The material and construction distinguish it from an image drawn directly onto a flat surface.

10. C. Felting

Felting joins fibers into a coherent material. Wet felting and needle felting use different methods, so both fit the broader process described in the question.

11. B. Scissors

Scissors cut fabric and many other materials. The question identifies the familiar tool without suggesting that every craft should use the same blade or cutting method.

12. A. Glaze

A ceramic glaze forms a surface coating during firing. Its appearance and function vary, so glossy is a familiar example rather than the only possible finish.
