Flowers and Garden Trivia

Questions 1-4 | Circle one answer

1. Which flower is famous for a large central disc surrounded by yellow ray florets?

A. Snowdrop
B. Bluebell
C. Sunflower

2. Which spring flower commonly grows from a bulb and has a trumpet-shaped center?

A. Poppy
B. Daffodil
C. Lavender

3. Which fragrant garden plant is commonly associated with purple flower spikes?

A. Marigold
B. Lavender
C. Daisy

4. Which part of a flower receives pollen?

A. Stigma
B. Root tip
C. Bark

Flowers and Garden Trivia

Questions 5-8 | Circle one answer

5. What is the transfer of pollen called?

A. Pruning
B. Germination
C. Pollination

6. What is a plant that completes its life cycle in one growing season called?

A. Annual
B. Perennial
C. Evergreen

7. What is a plant that lives for more than two years called?

A. Perennial
B. Annual
C. Seedling only

8. Which flower is widely used as a symbol of remembrance?

A. Tulip
B. Hydrangea
C. Poppy

Flowers and Garden Trivia

Questions 9-12 | Circle one answer

9. Which climbing garden plant often has fragrant flowers and prickly stems?

A. Lettuce
B. Climbing rose
C. Carrot

10. Which part of a plant usually develops after a seed germinates below ground?

A. Fruit
B. Root
C. Petal

11. What is removing spent flower heads commonly called?

A. Grafting
B. Mulching
C. Deadheading

12. What is a layer placed over soil to conserve moisture or suppress weeds called?

A. Mulch
B. Pollen
C. Nectar

Flowers and Garden Trivia

Answer guide 1-4 | Keep with host

1. C. Sunflower

A sunflower head contains many small flowers. The large familiar shape is a flower head rather than one simple flower with a single central seed.

2. B. Daffodil

Daffodils grow from bulbs and have a distinctive central corona. Calling it a trumpet offers a useful everyday description without requiring technical botanical vocabulary.

3. B. Lavender

Lavender commonly has aromatic foliage and purple flower spikes. Flower color can vary by variety, so the wording describes the familiar form rather than every plant.

4. A. Stigma

The stigma is the pollen-receiving part of the flower. This introduces reproductive structure while keeping the answer distinct from unrelated roots and woody tissue.

Flowers and Garden Trivia

Answer guide 5-8 | Keep with host

5. C. Pollination

Pollination is the transfer of pollen. It is not the same as germination, which refers to a seed beginning to grow under suitable conditions.

6. A. Annual

An annual completes its life cycle in one growing season. Garden labels describe growth patterns, not how often a gardener should water a plant.

7. A. Perennial

A perennial lives for more than two years. Some die back above ground seasonally, so a bare winter patch does not always mean the plant has died.

8. C. Poppy

The red poppy is widely used as a remembrance symbol. Keep this cultural association separate from assumptions about every participant's personal experience or beliefs.

Flowers and Garden Trivia

Answer guide 9-12 | Keep with host

9. B. Climbing rose

Climbing roses can be trained against supports. Their long stems need appropriate support rather than behaving exactly like plants that cling by tendrils.

10. B. Root

A root normally emerges early in germination and establishes access to water. The visible shoot is only one part of a young plant's development.

11. C. Deadheading

Deadheading means removing faded blooms. Its effects vary among plants, so the quiz defines the task without promising that every species will flower again.

12. A. Mulch

Mulch covers the soil surface. Materials and application methods vary, making the word a description of a gardening practice rather than one particular product.
